Task 2:

Trigger: The customer has placed an order and is ready to pay.

Preconditions:

- The customer has selected their coffee order.
- The system is ready to accept payment.

Basic Path:

- The customer proceeds to the window.
- The drive-thru manager confirms the order and provides the total amount.
- The customer selects a payment method (cash or card).
- If payment is successful, the system generates a receipt.
- The manager confirms the transaction and proceeds to give order.

Alternative Paths:

- Invalid Payment: If payment fails, the customer retries using another method.
- Order Modification: The customer requests a change before paying, and the system updates the total price accordingly.

Postconditions:

- The payment is completed successfully.
- The system updates the order status to Paid.

Exception Paths:

- If the payment is declined multiple times, the customer may cancel the order.
- If the transaction is interrupted, the system logs an incomplete payment status

Other:

- Assumptions: The customer has sufficient funds to complete the transaction.
